- **Instagram (Brand Managed)**: https://www.instagram.com/paint_serum/

Web Development Intern

Webbex Innovative India Pvt. Ltd.

June 2020 – September 2020, Chinchwad, Pune

- Designed and developed responsive web pages using HTML5, CSS3, JavaScript, and PHP, improving load speed by **20%**.
- Enhanced website features with senior developers, contributing to a **15%** increase in session duration.
- Integrated APIs and optimized debugging workflows, reducing manual data handling by **30%** and achieving **99%** cross-browser stability.

PROJECTS

AI-Based Autonomous Vacuum Cleaner with Disinfection

D. Y. Patil International University

- Engineered an AI-powered autonomous vacuum cleaner with UV-based disinfection, improving cleaning efficiency by **40%** and hygiene effectiveness by **35%**.
- Implemented ultrasonic obstacle detection, self-navigation, and human-following technology, achieving **95%** collision avoidance and reducing cleaning time by **25%**.
- Developed multi-control operation (Bluetooth + voice commands) with 3-in-1 cleaning modes, increasing user convenience by **60%** and enabling comprehensive floor maintenance.

Freelance Website and Software Development

Freelancing

- Designed and developed **21+ websites** and **5 custom software solutions**, increasing client digital visibility by **up to 45%** and improving mobile usability by **45%**.
- Built high-performance web and backend systems with authentication, APIs, and optimized architecture, boosting workflow efficiency by **40%** and user retention by **25%**.
- Delivered end-to-end client solutions with a **98% on-time delivery rate**, supported by ongoing maintenance that achieved a **95%+ repeat-client rate**.

Raspberry Pi Based Web Hosting Server

November 2024 – January 2025

- Configured a Raspberry Pi 3B as a full web hosting server with Cloudflare Tunnel, achieving **99% remote accessibility** and accessibility and multiple custom-domain websites.
- Deployed a complete mail server stack (Postfix, Dovecot, Roundcube) enabling **100% encrypted communication** and improving deployment efficiency by **40%**.
- Optimized server performance with DNS tuning, firewall rules, and uptime monitoring, maintaining **24/7 stability** with **less than 1% downtime** and boosting troubleshooting efficiency by **30%**.

EDUCATION

Bachelor of Technology (BTech) in Computer Science and Engineering (CSE)

Minor in Artificial Intelligence & Machine Learning (AI & ML) • Dy. Patil International University • Maharashtra, India • 2024 • 7.47

- Completed AI-driven projects in automation and IoT, including Smart Mirror, Autonomous Vacuum Cleaner, and a smart home system with voice control and real-time monitoring.

HSC

Minor in Computers • SSV Gyan Kendra School • Gujarat, India • 2019 • 60%

- Developed early technical foundations through coding competitions and team web projects, sparking interest in software engineering.

SSC

Minor in Mathematics • SSV Gyan Kendra School • Gujarat, India • 2017 • 70.30%

- Gained early foundations in math, reasoning, and electronics through school exhibitions, sparking interest in technology and programming.

CERTIFICATIONS

Introduction to Internet of Things

NPTEL • 2024

Cloud Computing

NPTEL • 2024

Learning Python

Linked In • 2023

Advanced Java Programming

Linked In • 2023

Introduction to Artificial Intelligence

Linked In • 2023

C/C++

Disha Computer • 2023

Web Development Internship

SSV Gyan Kendra • 2018

- Developed School Website during the Internship – www.ssvggyankendra.com

SKILLS
